ERB'S PATENT STRAW CUTTER AND INDEPEN-DENT CORN CHOPPER.

THIS very important invention has been in use about three years. The inventor has made improvements which have rendered it perfect as a STRAW AND CORN CUTTING MACHINE. It has given entire satisfaction to every one who has used it, and is the most superior machine in use, for the purpose for which it is designed. It is simple in all its parts, durable and easily kept in order. It is self-feeding, and easily worked by a boy 12 years of age.—
It will cut straw or corn; in the short trees but in the self-feeding. It will cut straw or corn in the shuck from half inch to three inches in length. Many certificates might be produced from Farmers who have used them, to prove their superiority over any other straw and corn cutter now in use. Persons needing such an article may rest assured that in it they will find a valuable acquisition to their farm

The subscriber has greatly extended his means for manufacturing these muchines, and he now solicits for them the attention of the public, and the farmers and planters particularly, of the South and West.
